SUMMARY

Early-career biology professional targeting research assistant, laboratory technician, QC analyst, and related laboratory-support roles. Experience includes undergraduate cancer research, molecular-biology and protein-analysis workflows, and regulated biopharma clean-room practices. Hands-on with RNA extraction, cDNA synthesis, qRT-PCR, BCA assays, SDS-PAGE, Western blotting, native PAGE, aseptic technique, and GMP/SOP documentation, with Python, R, and SQL projects as a practical analytical supplement.

TECHNICAL SKILLS

Wet Lab: RNA extraction, cDNA synthesis, qRT-PCR, BCA assay, SDS-PAGE, Western blotting, native PAGE, COL6 protein-expression analysis, GAPDH normalization

Regulated Lab: Aseptic technique, clean-room sanitization, GMP/SOP documentation, equipment logs, protocol adherence

Data & Software: Python, pandas, NumPy, SQL, SQLite, R, dplyr, ggplot2, MATLAB, Jupyter notebooks, Git/GitHub, Flask, Microsoft Office

Coursework/Familiarity: ELISA, cell culture, biochemistry, genetics, biostatistics

RESEARCH & TECHNICAL EXPERIENCE

Undergraduate Researcher | House Lab Cancer Research, SDSU

San Diego, CA | Aug 2022 - May 2023

- Supported molecular-biology and protein-analysis experiments in an ovarian-cancer research lab studying pathway and protein-expression questions.
- Worked with RNA extraction, cDNA synthesis, qRT-PCR, BCA assays, SDS-PAGE, Western blotting, and native PAGE workflows.
- Evaluated COL6 protein-expression patterns using native Western blot data with GAPDH normalization across ovarian-cancer model conditions.
- Maintained experimental records, sample tracking, and protocol-focused collaboration in work requiring accuracy, reproducibility, and careful troubleshooting.

Aseptic Cleaning Technician | Ajinomoto Bio-Pharma Services

San Diego, CA | Mar 2021 - Aug 2021

- Maintained sterile clean-room environments for biopharma manufacturing under GMP and SOP expectations.
 - Completed sanitization documentation, equipment logs, and procedure records with strong accuracy in a regulated setting.
-

INDEPENDENT BIOLOGY AND DATA PROJECTS | MARCH 2026 - PRESENT

Koi Behavioral Response Analysis | R, dplyr, ggplot2, chi-square testing

- Analyzed categorical field observations comparing koi responses to human-hand and simulated-predator stimuli.
- Visualized behavior proportions and interpreted chi-square results with stated limitations and attention to data quality.

RoVino Inventory Management System | Python, Flask, SQLite, SQL

- Built a database-backed inventory app with CRUD workflows, category filtering, low-stock alerts, restock history, authentication, admin controls, and JSON API access.

Published Data Feature-Enrichment Analysis | Python, pandas, notebooks, CSV data

- Cleaned and summarized published supplementary screening data to compare starting-library feature frequencies with functional-hit feature frequencies.
 - Calculated enrichment ratios and documented limitations so the project is framed as exploratory data analysis rather than direct antibody-engineering experience.
-

PROFESSIONAL EXPERIENCE

Manager / Bartender | RoVino Rotisserie & Bar

San Diego, CA | Nov 2024 - Feb 2026

- Promoted to manager after eight months; oversaw bar operations, inventory, staff scheduling, and daily workflow.
- Trained bartenders, servers, and new hires while improving service consistency and team reliability.

Server | Pacific Terrace Hotel - Bartell Hotels

San Diego, CA | Jun 2023 - Nov 2024

- Recognized as Employee of the Month in Oct 2024 for customer experience and dependability.
-

EDUCATION & LEADERSHIP

B.S. Biology | San Diego State University, San Diego, CA | Relevant coursework: Molecular Biology, Biochemistry, Genetics, Biostatistics, Organic Chemistry I & II.

Professional development: Python for Everybody/PY4E five-course Python data-analysis series.

Leadership: Academic Chair, Alpha Epsilon Pi Fraternity: mentored 125 undergraduates; SDSU Division I Hockey; Treasurer, Greeks Gone Green; medical volunteer, Ensenada; volunteer hockey coach.
